

## INSTALLATION/REMOVAL INSTRUCTIONS

### INSTALLATION STEPS

**STEP 1**  
Remove anchor stud

**STEP 2**  
Twist in CAP-IT finger-tight only  
(Clockwise direction)

**STEP 3**  
Check tightness periodically

### REMOVAL STEPS

**STEP 1**  
Untwist the CAP-IT  
(Counter-Clockwise direction)

**STEP 2**  
Install Anchor Stud to  
accept winter cover

### REMOVAL RECOMMENDATION FOR OVERTIGHTENED CAP-ITS

Periodically you may come across a CAP-IT that has been overtightened and you can't grip it enough to remove the CAP-IT. Simply place a piece of masking tape over the top of the CAP-IT and twist in a counter-clockwise direction. The masking tape provides extra gripping power to remove the CAP-IT without damaging it.

**STEP 1**  
Cover CAP-IT with piece  
of masking tape

**STEP 2**  
Untwist the CAP-IT  
(Counter-Clockwise direction)
